High quality pre-hire assessments and custom solutions to improve talent selection, retention, and productivity

About Us

ioPredict, Inc. specializes in the development and validation of exams for employee selection, licensure, and certification. Our tests are developed with a close eye on psychometric fundamentals, legal requirements, and tried and true best practices that guide our industry.

Our Doctorate and/or master's level Industrial-Organizational Psychologists each have more than 15 years of test development and validation experience and have conducted job analyses and developed and/or validated high stakes pre-employment and promotional tests for numerous public and private sector organizations.

As such, we are aware that selection tests need to address federal laws, regulations, and professional standards including, but not limited to, the:

- Civil Rights Act of 1964, as updated by the 1991 Civil Rights Act (Title VII)
- Americans with Disabilities Act (ADA) of 1990, as amended by the ADA Amendments Act of 2008
- Age Discrimination in Employment Act (ADEA)
- Federal Uniform Guidelines for Employee Selection Procedures
- OFCCP Federal Contractor Requirements and Regulations (such as the *Internet Applicant Regulation*)
- *Principles for Validation and Use of Personnel Selection Procedures* of the Society for Industrial and Organizational Psychology (2018)
- American Educational Research Association /American Psychological Association's *Standards for Educational and Psychological Testing* (2014)

Test Services

Off-the-Shelf Examinations

ioPredict offers a fresh library of entry-level and promotional exams that assess critical candidate aptitudes and knowledge areas required for success on the job. Our off-the-shelf exams are specifically developed for each classification and contain test items that are highly face valid (i.e., “items that look and feel like the actual job”).

Selecting the Best Exam

ioPredict offers the exams listed in this catalog as “off-the-shelf”. We also have question banks available that can be used to affordably create customized exams for a wide variety of positions. In addition, our test developers can custom develop exams from the ground up by writing new test questions specifically designed to assess relevant content areas. *Note:* If you do not see the exam you are looking for in this catalog, please contact us and we will conduct a thorough search of our item and test banks.

Online Test Pricing			
Test Type	Test Creation Fee	Per Candidate	Scoring
Off-the-Shelf	No Charge	\$18 – \$20	No Charge*
Customized MC Testing	\$599	\$18 – \$20	

* Re-scoring & re-sending scores (i.e., after removing items, double keying) is \$35.

Remote Proctoring

While many agencies are successfully and without incident utilizing unproctored online testing, remote proctoring is recommended in the following situations: (1) when administering public safety exams due to increased test security concerns, (2) when increased test security and defensibility of the testing process are an absolute must. ioPredict offers the following remote proctoring options:

Remote Proctoring for Online Testing	
Remote Proctoring Type	Per Candidate
Live Online Remote Proctoring	\$25 for the first hour, \$15 for subsequent hour(s)
Automated Remote Proctoring	\$15 per test administration

Additional Services

We also offer in-depth psychometric services as needed (e.g., score banding, adverse impact analyses, Differential Item Functioning (DIFF) analyses, distractor analyses, customized score or item/test reporting).

Customized Test Development and Validation

ioPredict also offers a full suite of IO focused consulting services including job analysis, custom test development (e.g., written tests, work sample tests, physical ability tests, interviews, personality tests) as well as test validation services for clients' in-house or vendor provided tests.

While legal compliance is critical, we also believe that tests and assessments should be valid predictors of an applicant's future success on the job (i.e., they are predictive and provide utility) or else they are of little use in the selection process.

Accounting / Fiscal

Accountant	
Administration Time: 120 mins	
Content Areas	No. Items
(1) Fiscal Terminology and Governmental Accounting	29
(2) Financial Recordkeeping	41
(3) Data Accuracy and Verification	5

Test Development and Test Validation

Test Development

ioPredict's consultants have a strong foundation in test development/psychometrics. Our consultants have between 20 to 40 years of experience developing all types of customized pre-hire assessments for the most demanding government and corporate clients. We custom develop and validate the following types of employee selection procedures:

- Custom written tests
- Work sample tests
- Physical ability tests
- Structured oral interviews
- Personality based assessments
- Assessment centers
- Biodata examinations

Test Validation

Employers using selection procedures whether created in-house or purchased from a vendor must show local evidence of validity when the tests result in an adverse impact. For the purposes of satisfying these legal requirements, users may rely upon criterion-related validity studies, content validity studies or construct validity studies, in accordance with the standards set forth in the federal Uniform Guidelines on Employee Selection Procedures (UGESP).

ioPredict staff have decades of expertise in conducting job analysis and test validation studies for high stakes hiring and certification examinations to ensure they are in compliance with all relevant federal laws, consent decrees, regulations, and guidelines as well as relevant professional standards, and provide peace of mind for our clients. While legal compliance is critical, we also believe that tests and assessments should be valid predictors of an applicant's future success on the job (i.e., they are predictive and provide utility) or else they are of little use in the selection process.

Contact Clinton Kelly, Ph.D. at ckelly@iopredict.com to schedule a class or to get more information.

Training for HR Professionals

Io Predict offers online virtual training for individual staff members or for your entire staff.

	Individual	Staff
2-hour Training	\$50	\$800
Half-day Training	\$95	\$1,500
Full-day Training	\$175	\$3,000

The Full-day workshops are administered over two consecutive half days. Staff training is for up to 15 staff members and can be scheduled at your agency’s convenience. Additional staff members can be added to the staff session at the individual rate. In-person training may incur additional costs for mileage, meals, and travel time. The individual classes are on an open enrollment basis; the dates of the open enrollment classes are listed in on the io Predict website. Training topics include the following:

Job Analysis: Job analysis is the foundation for many human resource-related activities, such as employee selection, training and development, workforce planning, and performance management. It involves researching a job to determine which work behaviors and responsibilities it includes, the required qualifications necessary, and the conditions under which the work is performed. This full-day workshop will provide an overview of the job analysis process will provide guidance on how to conduct a job analysis that is compliant with the Uniform Guidelines on Employee Selection Procedures and show participants how to leverage the results of the job analysis to develop a plan for the development of employment selection tests.

Examination Development: This full-day workshop will instruct participants on the various types of assessment instruments used to select quality employees. The types of examinations covered in the workshop include: written multiple choice tests, structured oral interviews, physical agility tests, training and experience ratings, and work sample tests. Additional topics to be covered include: reliability and validity, passpoint setting, and ranking candidates.

Pass Point Setting & Adverse Impact: In this two-hour workshop, participants will learn how to set defensible exam pass points. Topics to be discussed include: pass point considerations; adverse impact and diversity; test reliability and precision; and test utility/validity. Alternative methods for pass point setting will also be discussed (e.g., Angoff method).

Multiple-Choice Item Writing: In this two-hour workshop, participants will learn how to write and edit quality multiple choice test items. Topics to be discussed include: multiple choice terminology; item formats; item difficulty levels; item writing clues and errors; and face validity. The instructor will also present strategies to help item writers manage the process of developing quality multiple choice items.

Test and Item Analysis: This two-hour workshop will guide participants through the process of conducting test and item analyses on multiple choice tests. Test analysis topics will include reliability, validity, standard deviations, skewness, kurtosis, and the standard error of measurement. The workshop will also instruct students on how to apply the 80% Rule (or 4/5 Rule) to determining whether an exam has adverse impact. Item Analysis topics will include p-values (difficulty measures), item discrimination indexes (biserial and point-biserial correlations), and distractor analysis.

Data Analysis for HR Professionals: The primary focus of this full-day workshop will be the identification/classification of the four variable types: nominal, ordinal, interval, and ratio variables, and how the variable types will determine the proper statistical analysis to use and how to graphically present your data. Topics to be discussed include: data analysis terminology, identifying rating scales and variables, data collection and sampling techniques, and how to present your data graphically and in reports. The instructor will also lead a discussion on the ethical use and presentation of data. The course consists of lectures, group discussions, video presentations, and structured group exercises.

Classification and Compensation: The primary focus of this full-day workshop will be to define the steps required to perform a Classification and Compensation study. Your agency’s classification structure will dictate how the agency recruits, retains, develops, and ultimately rewards its employees. Topics that will be covered include: agency class, salary, and benefits structure; developing classification titles, levels, abolished or unused classes, and MQs within job families and across the organization; surveying the labor market; appropriate pay differentials, pay philosophy, and salary design techniques.

Structured Oral Interviews: This half-day workshop will provide an overview of the structured interview and why structure results in better hiring decisions when compared to an unstructured approach. We will review what to assess in an interview, the different types of interview questions, how to develop job relevant questions, and how to create behaviorally anchored rating scales (BARS). In addition to the development of the interview itself, we will provide guidance on best practices for interview administration and scoring (e.g., number of raters, rater training, individual scoring versus consensus approach). The objective of this workshop is to provide practitioners with the expertise they need to create and administer their own structured interviews.

Client Testimonials

El Dorado County Human Resources has engaged ioPredict for exam development and administration. We have found them to be knowledgeable and helpful. The exam material they produce is good quality and provided on time or early. We have found this especially helpful during the current pandemic which has substantially changed how we conduct pre-employment exams. They have been a reliable resource to help us navigate the current situation and will no doubt continue to do so after.

- El Dorado County

I just wanted to share a quick note and let you know that ioPredict does a really good job. I'm glad that the City of Pasadena decided to work with you. It's really great how quick and easy it was to develop and administer the on-line unproctored/unmonitored exam for our Electrical Craft Helper vacancy. The time and resources saved testing nearly 400 candidates was notable. However, I was most satisfied that your company was able to provide an exam that worked on multiple platforms including a smart phone. Thank you for saving us time and allowing us to test candidates through the United States!

- City of Pasadena

ioPredict has been a life saver in this time of COVID-19. Our agency was considering online testing earlier in 2020 but it's a scary move for the public sector; there is a perceived loss of control. ioPredict eased us into the change and has been affordable, flexible, knowledgeable, accommodating, and responsive to our needs. For the first time, I was able to complete the selection process for a high volume, entry level administrative recruitment in four weeks. There were three steps in the process including an ioPredict test. The Zoom oral boards confirmed we captured a great group of candidates. We are so grateful to have found ioPredict; fast, smart and solution driven!

- City of Vacaville

Contra Costa County has developed a great partnership with ioPredict. Their dedication to assisting us in meeting our goals of developing online, unproctored assessments has been evident from the beginning. They are responsive and work quickly. This has been critical for us to continue operations during the COVID-19 pandemic.

- Contra Costa County

I thought the overall process was great. I really liked the fast turnaround of results and the detail in terms of especially who did not sign in to complete or start their test is also really helpful.

- Long Beach Community College
